The disclosure is objected to because of the following informalities: In the specification paragraphs 0009, 0010, 0026, and 0027 “setting”, 0023 “phosphorate”, and 0026 “medicaments” appear to be erroneous.

Appropriate correction is required.

Claims 6 and 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 6 and 13 “medicaments” and “setting” appear to be erroneous. Claims 14 and 15 depend from claim 13.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Krulik et al. 6,645,385. It is submitted that Krulik et al. disclose (see col. 1 line 19 through col. 7 line 50) the method steps recited in the instant claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1724

Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krulik et al. as above, and further in view of Yamasaki et al. 6,572,771. The claims differ from Krulik et al. as applied above, by reciting specific steps for adding and mixing flocculants and polymers.

Yamasaki et al. disclose (see col. 13 line 17 through col. 14 line 34) that it is known in the art to calcium hydroxide, polychlorinated aluminum, and macromolecular flocculant, in separate mixing steps, to aid in settling calcium fluoride from wastewater. It would have been obvious to one skilled in the art to modify the method of Krulik et al. by including the recited adding and mixing steps in view of the teachings of Yamasaki et al., to aid in separating fluoride from the wastewater. The specific type of mixing utilized in the tanks, would have been an obvious matter of process optimization to one skilled in the art, depending on the specific wastewater treated and results desired, absent a sufficient showing of unexpected results.

Claims 9-12 are allowed.

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13-15 would be allowable if rewritten to overcome the rejection under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
